

Alberta Safety Council Canadian Red Cross

An Alberta Women's Institute has taken second place in a Canada-wide traffic safety competition. Bill Perkins, former safety director for the Alberta Safety Council announced last week.

The winning group is the Echo Hill Women's Institute and the prize is the Carol Lane Award worth \$500. The annual contest among Canadian women's groups is administered by the Canadian Highway Safety Council. The grant from the Shell Oil Company of Canada, Limited.

The prize winning project of the Echo Hill group involved mounting red reflective tape on 396 pieces of district farm machinery. Echo Hill is in the Busby-Pleardville area, about 270 miles from Edmonton. The campaign was a undertaken when the W.I. became concerned over frequent reports of accidents and near accidents involving heavy farm machinery travelling district roads at night. Fourteen W.I. members from 14 H.C. communities attached the tape to machinery on 73 farms. The material was purchased with W.I. funds from the Alberta Safety Council.

On the W.I. a safety committee are Mrs. Lloyd McMillan, Mrs. William Cline, and Mrs. Sam Yeomans.

The Carol Lane Awards have been established. Mr. Perkins said "to recognize, and reward, women's achievements toward the preservation of lives through traffic safety programs during their community province or nation."

They are named in honor of the women's travel director of Shell Oil and are given to the three women's groups which "have developed and directed the most effective traffic safety programs during the previous year."

Other winners for 1959 were the Toronto Junior League, first prize; and the Montreal West End Safety Council, third prize. The judges included representatives from the National Council of Women of Canada, Chataine Magazine, the IOOE of Canada, the Canadian Labor Congress and the Department of National Health and Welfare.

Grasshopper Forecast

Ortawa, March 17, 1960—A slight reduction in severity and total area of grasshopper infestation, is forecast for 1960 on the prairies.

Grasshopper winter breaks have been fairly serious.

Light or moderate infestations are forecast for 78 townships in Manitoba, 797 in Saskatchewan and 286 in Alberta. Some infestations are forecast for 38 townships in Saskatchewan. In Alberta the infested area is considerably larger than in 1958 or 1959.

P.F.A.A. Payments

Agricultural Minister Mackenzie told the House of Commons last night that 35,033 owners of P.F.A.A. equipment are totalling about \$11 million, but has made up to that time with respect to the 1959 owners. The P.F.A.A. Association has been unable to make up the payments, but they are expected to be in the neighborhood of \$10 million. Payments for the 1958 crop total \$23.1 million.

By now you sit in Delia Times

DELIA W.M.S.

The March meeting of the Delia W. M. S. was held in the home of Mrs. Baras, with 13 members and 2 visitors present. Opening hymn, "Blessed be the Tie that Binds," was followed with a prayer by Mrs. Hewson.

Turner conducted the devotional on the theme: "Judge Not, Let Ye Be Judged."

Mrs. Whitman offered a prayer for Peggy MacMillan.

The minutes were read and approved and correspondence read, and the secretaries gave their reports.

Mrs. S. Sloan and Mrs. Oakes led study period on, "Africa Disturbed."

Closing hymn, "Near the Cross," was followed with the Benediction.

Mrs. Long and Mrs. Baras served a very delicious luncheon.

Cutworms and Weather

Research Bulletin Weekly Letter, Lethbridge, Alberta.

L. A. Jackson, Edmonton, July.

In Western Canada considerable variation in weather occurs from year to year, from season to season, and even from day to day. This history of crop growing reveals that abundance and severity of insect pests has varied considerably during the past five years. Severe outbreaks of cutworms, grasshoppers, wheat stem sawflies, wireworms, and other pests have occurred at various times. These outbreaks occurred have been directly associated with the weather that was experienced during the year.

Reinfestation during the growing season, April through June, is the main climatic factor that influences increase or decrease in numbers of the pest western and, to a lesser extent, the red-backed cutworms. Wet weather leading to a decrease by forcing the cutworms to feed on the soil surface where their numbers are reduced by predation, and, in some instances, disease. Several successive seasons of dry weather result in an increase of cutworms. This association between rainfall in the spring and early summer in the basis of a method of forecasting. Forecasts are prepared at Lethbridge each year in July and indicate the areas in the prairies where an increase or decrease can be expected to occur during the next year.

Another cutworm, the army cutworm, is a frequent pest of many areas of Western Canada. It is a pest of the winter wheat and in the spring and causes damage in crops in April and May. The larvae hatch in the fall, live over the winter partly grown, and complete their development in the spring. The moths are present in summer but do not lay eggs until July. They lay eggs in the soil, and in August temperatures are fairly cool and September is moist, infestation usually occurs the following spring. Such conditions do not occur every season, which accounts for the infrequent appearance of this cutworm.

To summarize, it is apparent that weather is a major factor influencing the abundance of many insects which are pests of the pulse western outcrop, in particular, tends to increase in numbers following years of sub-normal precipitation. The number of the prairie wheat has experienced lower-than-normal rainfall during the past two seasons.

Twelve-one percent more are registered in Canada for 1959 driving than were recorded in 1958.

Minutes M.C. Council of Starland, No. 47

The monthly meeting of Council of Municipal District of Starland, No. 47, was held in the municipal office at Morrin, on Tuesday, March 15th, 1960, commencing at 8:30 a.m.

Members present as follows: Reeve McLaren, Deputy Reeve Nelson, Councilors Chambers, Brown, and Perry.

Minutes of the regular meeting of February 9th, and Special committee meeting of February 17th, were read and approved, on motion of Counciling Chambers.

Minutes of Annual Meeting of February 20th, were also read to Council.

Moved by Counciling Chambers, that members approve action of Reeve McLaren in having meeting date changed from March 8th to March 15th. Carried unanimously.

Geo. W. Robertson reported on Field Supervisor and Civil Defence activities for the past two months. He mentioned his trip to Amherst, Ontario, in February and that a candidate from the municipality was elected for a course at Amherst this month.

Under Agricultural Service Board, a report was made of the Regional conference in Statton, Juneau, concerning grants to Agricultural Society meeting in Drumheller, attendance at Short Course, and plans and opening of cattle for market and sale.

Reports were accepted by Council on motion of Reeve McLaren.

Secretary Municipalized Council that application of Big S. Sloan, Delia, to purchase land through Starland Farm Purchase Board had been approved by the Provincial Agricultural Board, and application of Howard A. Humble, Delia, had been placed on the "hold" file by said Committee, and that further information also that application of G. Dale Flett, Drumheller, had finally been approved.

Application to Starland Farm Purchase Board of Edwin Kittling, Calgary, to purchase land, Delia, Hertz J. Dyck, Calgary, and Ralph W. Miller, Morrin, were discussed by Council.

Public Works to K. L. Striker reported on Council on the Safety and First Aid Clinic meeting in Calgary under the auspices of the Workmen's Compensation Board, February 22nd to 26th inclusive, and again on the next day of 1959 following with Council.

Moved by Reeve McLaren, that final application under Federal-Provincial Emergency Fairbairn Grain Assistance policy, as authorized by Council and listed on schedule "A" (3) attached to the report, be approved for payment and that Reeve and Secretary-Treasurer be authorized to sign same on the schedule "A" (3) attached to the report, and that the applications be forwarded to Field Crops Commissioner, Department of Agriculture, Edmonton.

Moved by Counciling Perry, that a by-law be passed (as directed by the Alberta Assessment Appeal Board) to amend municipal by-law No. 321 (Business Assessment and Taxation), as follows:

The assessment rate on grain livestock, and on grain livestock, (in particular, on bush to (3) cents per bushel, and on grain livestock from five (5) cents per bushel, to two cents (2) cents per bushel, (3) cents per bushel.

By-law No. 337 was accordingly given three readings, and passed unanimously.

Moved by Reeve McLaren and carried, that the \$93.34-20-16 be issued to Alfred Kirkby, Calgary, for a year end of one (1) year from April 1st, 1960, at a full one third (1/3) share of crop, plus \$12.00 per annum for grass.

(are read, and that the necessary by-law be passed).

By-law No. 338 was accordingly given three readings and passed unanimously.

Moved by Counciling Chambers and carried, that \$83.10-33-16 be issued to George R. Grose, Calgary, for a period of one (1) year from April 1st, 1960, at a full one-third (1/3) share of crop, plus \$20.00 per annum for pasture rent, and that the necessary by-law be passed.

By-law No. 339 was accordingly given three readings and passed unanimously.

Moved by Deputy Reeve Nelson and carried, that \$84.17-33-10-4 be issued to George M. Maclellan, Calgary, for a period of one (1) year from April 1st, 1960, as a "haying lease" at a full one-third (1/3) share of hay in stacks or bales, and that the necessary by-law be passed.

By-law No. 340 was accordingly given three readings, and passed unanimously.

Council members were advised that the following appeals to the Alberta Assessment Appeal Board are on hand:—Paul Salemann (NVI 20-23-14), John R. Howe (NVI 28-20-10), and Frank Krosner (SW 4-53-16).

In response to correspondence from the Director of Hospitals Division, Department of Health, a report was moved by Counciling Brown that application be made the Department of Public Health for the establishment of an auxiliary hospital facility, and the construction of an auxiliary hospital in conjunction with the Drumheller Municipal Hospital. Carried unanimously.

Sask. tourist film available

"Panorama of a Province," a new tourist film featuring the various vacation activities and attractions in Saskatchewan, is now available for distribution. Provincial tourist director Harvey Dryden announced recently.

Fifteen minutes in length, the film takes the viewer on a picturesque trip through many of Saskatchewan's provincial parks and resort areas. It also shows exciting scenes of a family holidaying happily and comfortably and have trout at Lac La Poudre.

During the summer months, Valley Center at Port Qu'Appelle becomes the headquarters for many artists, writers and craftsmen. The film catches these people at work on their daily projects.

Some of Saskatchewan's history is included in the film and scenes are shown of Red River carts which mark the routes that settlers and pioneers took on their trips across the province. Fort Battleford National Historic Park, the old district headquarters for the North-West Mounted Police, is illustrated in detail.

Other museums in Saskatchewan, including the Museum of Natural History in Regina and the Western Development Museum, are depicted. Also included in the film are other famous sites, such as the University of Saskatchewan in Saskatoon, and the Legislative Building and the Royal Canadian Mounted Police barracks in Regina.

Mr. Dryden said the film will be distributed throughout the United States and Canada. In the United States, it will be distributed through the various offices of the National Film Board.

"Panorama of a Province" was produced by the tourist branch, department of travel and information. The film was shot by Dick Bird, well-known Regina photographer.

It is available for booking free of charge from the Tourism Bureau, Legislative Annex, Regina.

OLDEST U.S. TWINS MARK BIRTHDAY

Mattie and Sarah Duckworth, Fillmore, Calif., believed to be the oldest twins in the United States, February 10th celebrated their 94th birthday.

Born in 1866 on a farm just outside Mount Vernon, Ind., the twins came to California separately, married at different times, and their husbands and moved here together in the same town with their "baby" sister Jeanette, who is 81.

During the Stevenson-Blosser campaign, the twins made it known that one is a lifelong Republican and the other a steadfast Democrat.

QUEEN'S UNIVERSITY
Much of the money to fund Queen's University at Kingston, Ont., came from the Presbyterian Church in Scotland, and the school was established on the University of Edinburgh.

Printed directions on each pattern part. Basic, accurate.

Send Forty Cents (40c) in coins (stamps cannot be accepted) for this pattern. Please print clearly Name, Address, Style Number and send to:

Anne Adams Pattern Dept., Department L.P.D., 60 Frost Street, W. Toronto.

\$85 Million in "Green Gold"

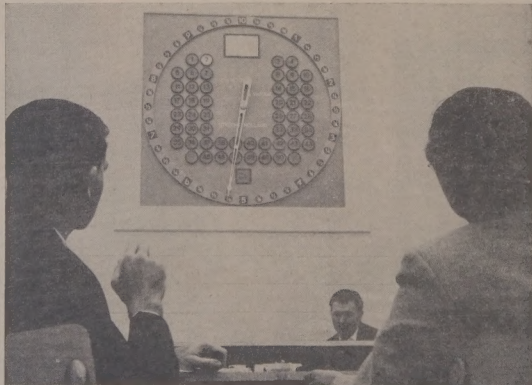

Tobacco is one of Ontario's most profitable agricultural products and the 1959 crop presently being marketed is expected to bring in an estimated \$85 million. While last summer's production was slightly down from the 1958 all-time high of 176 million pounds of flue-cured tobacco,

higher prices for what is considered to be the "finest quality crop" ever harvested is expected to compensate for loss due to acreage reduction, hail and early frost. Above, buyers at the Ontario Flue-Cured Growers Marketing Warehouse at Tillsonburg, Ontario.

With employment in Canada at the highest level in history, manpower to harvest the "green gold" presents a problem. Tobacco is planted by machine, cultivated by machine but it must be harvested by hand, one leaf at a time, when that

leaf is ripe. Primers, who work 6 to a team filling horse-drawn "hoons", are paid \$14 a day (plus board) during the frenzied 6-week harvest of what has been described as one of the richest but "chancier" crops in Canada.

Today the Dutch Clock system of auction has replaced the old-time method of "barn buying". The face of the clock is graduated to price intervals and has a large sweep hand. Numbered rounds of glass which stud the centre of

the face are controlled by push button lights from the buyers' desks. The Dutch Clock auctioneer stands well above the market price and comes down in quarter cent drops.

National Film Board of Canada Photos

STILL EXPRESSING SURPRISE, fire captain Richard Lewis of Los Angeles looks at his new son held by student nurse Katherine Burkhart. The baby which Lewis helped deliver was not expected by either parent. Mrs. Lewis told her husband: "I feel like I'm going to have a baby," Lewis said "Go ahead," knowing they weren't expecting one. A few minutes later he helped wife deliver infant.

FOR BUSINESS—A roomy and practical bag to a must in a business girl's wardrobe and here is a smart spring number with several convenient features. Large enough to hold a business girl's essentials yet not cumbersome to carry. It has well-anchored handles and easy-to-open flap. The front zipper pocket is ideal for holding transportation tickets, credit cards and change purse. Made by Vogue fashions of Montreal of fast-wearing "Patentle" material in a leather grain featuring a pebbly textured leather. The bag has the soft feel so much in demand today. It is available in five colors: black, brown, tan, beige and white.

Today's farmers include many of Dutch, Belgian, Hungarian, German and Polish descent. Nimble-fingered women in the leaves for the kiln. After that the success of the crop is in the hands of the "cure-man". He must keep

A fire going, raising the temperature gradually, for 1-6 days. A mistake on his part could be costly. Many of the "cure-men", such as the one shown above, come up from the American south.

WHEN MONEY IS TIGHT

As has been the case in Canada for the last several months, it is not uncommon for some people to ask why the Government or the Bank of Canada don't loosen the purse strings a bit and provide the various lending institutions in the country with a larger stock of dollars.

The Government has no power to create dollars. In so far as the central bank is concerned, it may increase the supply of money in circulation, but it must do so in a way that the purchasing power of the dollar is not undermined. Governments and central banks that print paper money and distribute it willfully without regard for the inevitable dilution in the purchasing power of the currency are just downright dishonest, caring not a tinker's dam whether everyone's savings are destroyed.

Real dollars can be created in only one way. They must be made by earning them through work performed. When money is tight and interest rates are high, it simply means that demand for money exceeds supply. To bring demand and supply in closer balance, people have to work harder, save more dollars and spend less. Productivity and thrift are two indispensable ingredients of true economic growth.

Local & District

Monday, March 21st, was the first day of Spring according to the Calendar.

The weather was generally mild during the past week, with high winds and overnight low temperatures. The mercury at this writing reads 45 above.

Mr. and Mrs. Fred Mason were business visitors by car to Hanna the beginning of this week. . . . Drumheller School Division, No. 80, have accepted the tender by Greene Construction Co. for the erection of a four-room addition to the school at Morrin. . . .

The Canadian Red Cross is again making its appeal for money to finance its many activities. Your contribution will be very helpful and greatly appreciated. . . . The Delia High School Dramatic Club will present a play titled "Uncle Willie Wing" in the High School Auditorium on Friday, April 8th.

No one questions the necessity of affording some measure of aid to those who, through no fault of their own, are temporarily unemployed. Moral benefits may be derived, but it is the Unemployment Insurance Fund is, on occasion, merely the source of extra income for those who are really in need at all.

Real gain in the Unemployment Insurance set-up is that the benefits may be drawn by people who happen to be out of their regular job, even though other employment in a different line of work may be available. Thus many seasonal workers who make a good income by working a few months prefer to remain idle and collect unemployment insurance, rather than to take up some alternative form of employment. This sort of thing makes a mockery of unemployment insurance. It makes a mockery, too, of the taxpayer who foots the bill for off-season loafing on the part of many who would have no trouble picking up a job in some other line of work.

Grain Treated With Poisonous Chemicals

It is getting around to the time of year when a good deal of the grain is sent to Western Canada which is sold to Western Canada when it has been treated with poison. Every year, when sending has been completed, a certain amount of grain is sent to Western Canada which is sold to Western Canada when it has been treated with poison. Every year, when sending has been completed, a certain amount of grain is sent to Western Canada which is sold to Western Canada when it has been treated with poison.

Once again elevator agents have been warned to watch for, and to refuse acceptance of, any quantity whatever of treated grain. Most of this is quite easy to detect by sight. Probably can do this by looking at the grain which has been treated does not become mixed with grain that is not treated. . . .

The removal of straw from a 15-acre field is equivalent to removing approximately as much nitrogen as would be contained in a ton of ammonium nitrate costing about \$90. says A. W. Gossel, Alberta's assistant secretary of soils and weed control. . . .

Don't Burn Straw

Correspondence was read from Hon. Gordon E. Taylor, Minister of Highways, acknowledging letter in which the Department of Highways was requested to take over the road from No. 9 Highway at Morrin Cross to No. 21 Highway near Three Hills. Mr. Taylor's reply was that it is not the intention of his department to take over the road at the present time, but that they will assume the cost of grading on the two hills that lead to the bridge. . . .

Moved by Deputy Reeve Nelson that a letter be forwarded to the Superintendent, C.N. Railway, recommending that "daylines" be painted a bright and reflecting color, such as orange or red, so as to be more visible to the traveling public; also that some system of lighting be installed at the top of the poles, building flashing lights, so that engineers can determine if lights are working. Carried.

GOOD SEED FOR 1960

Cleaning and Treating Pays
Provised seed grain (1960) surveys continue to show that we are not getting enough seed grain to the type of seed we use. . . .

Good Year Seed. Surveys show that over 90 per cent of seed grain used in the Prairie Provinces is home-grown or obtained from a neighbor. Unfortunately, only a small proportion of this seed is cleaned to good standards despite the fact that it is possible, by proper "grading" to increase the value of home-grown seed for planting purposes. . . .

GROWING PROFIT?

M.D. Council of Starland

(Continued from First Page)
Correspondence was read from Hon. Gordon E. Taylor, Minister of Highways, acknowledging letter in which the Department of Highways was requested to take over the road from No. 9 Highway at Morrin Cross to No. 21 Highway near Three Hills. Mr. Taylor's reply was that it is not the intention of his department to take over the road at the present time, but that they will assume the cost of grading on the two hills that lead to the bridge. . . .

Moved by Deputy Reeve Nelson that a letter be forwarded to the Superintendent, C.N. Railway, recommending that "daylines" be painted a bright and reflecting color, such as orange or red, so as to be more visible to the traveling public; also that some system of lighting be installed at the top of the poles, building flashing lights, so that engineers can determine if lights are working. Carried.

1960 GMC TRUCKS

Let your more than 14,000 miles of road of unlimited release were overnight jobs at right Red Cross Judges. . . .
